

Compact, light-weight pneumatically-operated drilling units

SELFEEDER ELECTRIC

SSE2

Most compact and lightweight unit. Ideal for small-diameter drilling.

The ES2 type has been renewed

by replacing induction motor with a PM motor.

Global Support **Variable Spindle Rotation**

Specifications

														Su	pply air p	ressure at	0.5 MPa	
Specifications	No-load rotation speed 50~120 Hz	Spindle Torque	Chucking capacity	Drilling Capacity					Stroke		Motor Specifications				Air			
					1-SP		2-SP		Total stroke	Cutting feed stroke	Rated Power	Rated Rotational Speed	Rated Current	Thrust	Consump tion	Weight

- Notes:

 1. The selection of models should be based on the shape of the work, material, cutting characteristics, diameter and material of tools, rotational speed (cutting speed), etc.

- 1. The selection of mode's should be based on the shape of the work, material, cutting characteristics, diameter and material or took; rotational speed (cutting speed), etc.
 2. The drilling capacity displayed in the above table is based on values representing a drilling depth of twice the diameter of the drill.
 3. The RB-2430 comes standard with a Hydro Speed Regulator. A Hydro Speed Regulator is available as an option upon request.

 [Optional Hydro Speed Regulator models are: RB-2460, R-2442A, R-2462A, and R-2482A)

 4. Make sure to use a collet chuck or spindle nose when the hardness of carbide drills and tool shanks is higher than that of general HSS [high-speed steet] drills.
 5. Valveless specification is standard. If you require valve block specification [former standard specification], please order valve block ass'y separately. [Replacement to be made by customer]

Dimensions (mm)

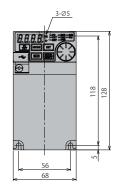

-Speed Regulator

Configuration diagram

Inverter

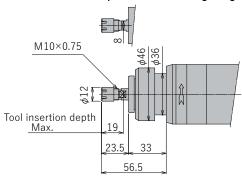

FR-E820-0.2K

Tip shape

■ Collet chuck / spindle nose (option) Model No.: ER8 or equivalent (chucking range ϕ 0.5 to ϕ 5)

Note 1: Detailed dimensions of spindle tip are as recommended for REGO-FIX ER collets. 2: Collet, collet nut, and wrench are not included. Please order separately.

I/O Signal Specifications

1/0	Signal	Name						
	STF	Unused						
	STR	Spindle ON						
	RH	Multi-step spd (1 to 15 spd)						
Innut	RM	Freq set range 50 to 120Hz						
Input	RL	Can be set						
	MRS (REX)	in 5Hz increments						
	RES	Reset						
	А	Abnormal Output(Relay) Normally-open contact						
Output	В	Abnormal Output(Relay) Normally-closed contact						
	RUN	In operation						
	FU	Freq detection						

Option

■Hydro-speed regulator

A hydraulic feed speed control unit that can adjust the feed rate of an air cylinder to any desired speed. For details, please refer to our web page.

■Operate Signal Kit

This kit is designed to accurately detect the operation of a Selfeeder and control synchronized operation with other devices. For details, please refer to our web page.

■Multi-spindle head

Various multi-spindle heads are available. For details, please refer to our web page.
